

# Thesis Skeleton

Pruthvi Mehta

October 6, 2021

1	Neutrino Physics
2	The Super-Kamiokande Detector
3	Super-Kamiokande Detector Calibration
4	The UK Light Injection System
4.1	Hardware and Electronics
4.1.1	Data Processing
4.2	Light Profile Monte Carlo Development
4.2.1	Comparison with UK Light Injection System Data
4.2.2	Analysis Results and Parameter Measurement
5	Super-Kamiokande Gadolinium Upgrade
6	Measurement of Neutral Current Quasielastic Interactions with Super-Kamiokande Gadolinium Upgrade
6.1	Event Simulation
6.2	Event Reconstruction
6.3	Neutral Current Quasi Elastic Sample Selection
6.4	Neutron Tagging Algorithm
6.5	Application of Neutron Tagging Algorithm to MC and Data Samples
6.6	Neutron Tagging with Super-Kamiokande Gd
6.7	Final neutron multiplicity values
6.7.1	Systematic uncertainty calculations
6.7.2	Statistical uncertainty calculations
7	Conclusion
8	Bibliography
